LEADING THE WAY TO SAFETY.

IPAF MEWPS For Managers Training Course

IPAF MEWPS For Managers Training Course

About the course

Companies that use MEWPs need to know what their management responsibilities are and what their legal responsibilities are. The course covers what managers need to know about the safe use of MEWPs on site, from planning the job and conducting a risk assessment, to selecting the right equipment and mitigating all possible risks.

Under UK health and safety legislation, specifically, the Provision and Use of Work Equipment Regulations 1998 (PUWER) and the Work at Height Regulations 2005, employers must train all employees who plan, supervise and manage work at height and the use of equipment for such work.

Who should take this course?

Employers, project managers, foremen and supervisors working in a broad range of industries such as construction, facilities management, retail, airports and arboriculture. Anyone who is responsible for planning and overseeing the use of MEWPs on their job site.

Qualification

This course is about planning, supervising and managing the use of MEWPs, and not about operating equipment. It ends with a written test that candidates must pass. Upon successful completion of the theory test, candidates will receive an IPAF certificate.

Those who hold a valid Powered Access Licence for operating equipment can have the MEWPs for Managers (MM) category added to their PAL Card.

Course Duration:

1 Day
